Sep. 2018 - Dec. 2020

PROJECTS

Discord Bot

Designed, implemented, and deployed automated systems utilizing web APIs to process and generate content and extend functionality for a major online social networking platform called discord. I used software like heroku to make the bot online, and github. I used javascript to build this application.

Greenwell Corporation

Worked with an organization to help build and fix their website. Collaborated with a developer team to establish this project. I used software like wordpress, and lucidchart. I used python to develop this project.

Eportfolio

Designed, developed, and maintained my own personal e-portfolio. I learned about how domains work, how to publish my website and how to keep the website online. I learned HTML, and some react. I used software like VS code, and github.

SKILLS

Microsoft applications | Bilingual (English, Hindi, Punjabi) | Python, Java, C, Javascript, HTML |

Algorithm and Data Structures | Customer Services | Git and GitHub
